Heuristics evaluation

Group Aggregated Evaluation Tables

ID	Combined Name	Heuristic(s)	Evaluators
HE-01	TripTak logo in the top left should act as a home link, rather than the home button in the top bar.	H7 Flexibility, H3 Freedom	vvI-HE-01, rI-HE-01, jvr-HE-01
HE-02	Upvote counter on profile is too big and stands out too much	H8 Aesthetics	vvI-HE-02
HE-03	Shouldn't have a login link option on the actual login page.	H4 Consistency	vvI-HE-03
HE-04	Shouldn't have a sign up link option on the actual sign up page.	H4 Consistency	vvI-HE-04
HE-05	Shouldn't have an FAQ link option on the actual FAQ page.	H4 Consistency	vvI-HE-05
HE-06	On the home page, there is a space where login is removed, which looks strange in the header.	H4 Consistency	vvI-HE-06, rI-HE-02
HE-07	Login/Register pages should have events scripted for invalid email addresses, usernames, and passwords.	H5 Error Prevention, H9 Error Recovery	rI-HE-03
HE-08	Events scripted when user tries to add the same destination twice to their itinerary if it is being scheduled on the same day or during another scheduled destination	H5 Error Prevention, H9 Error Recovery	jvr-HE-02, rI-HE-04
HE-09	The term "upvoted" may be unfamiliar to certain users; perhaps change to "Highest rated"	H2 Matching	rI-HE-05, jvr-HE-03
HE-10	The only button in the home bar with an outline is the "signup" button.	H8 Aesthetics	rI-HE-06

Grand Tetons

Usability Access Report

1)

ID: HE-01

Name: TripTak logo in the top left should act as a home link instead of the home button in the top bar.

Evidence: When you click the site logo it does nothing, but when you click the "home" link it takes you to the home page.

Explanation: This is rather uncharacteristic for the industry convention, and it forces users to locate the home button among the top right header bar for a simple task.

Severity: 3

2)

ID: HE-02

Name: Upvote counter on profile is too big and stands out too much.

Evidence: The icon and number takes up the entire right side of the

Explanation: It feels quite pasted on compared to the placement of the other elements on the page, and its color makes it even more jarring.

Severity: 1

3)

ID: HE-03

Name: Shouldn't have a login link option on the actual login page.

Evidence: There is still a link option to login when the user is on the login page.

Explanation: It's an unnecessary element and borderline redundant on the page layout.

Severity: 1

4)

ID: HE-04

Name: Remove Sign Up on Top Bar while on Sign-Up Page

02

A card creator website made for my Fall 2021 final project in a team of three. I designed the page layout with two of pleasing colors that could be toggled via a button at the top left.

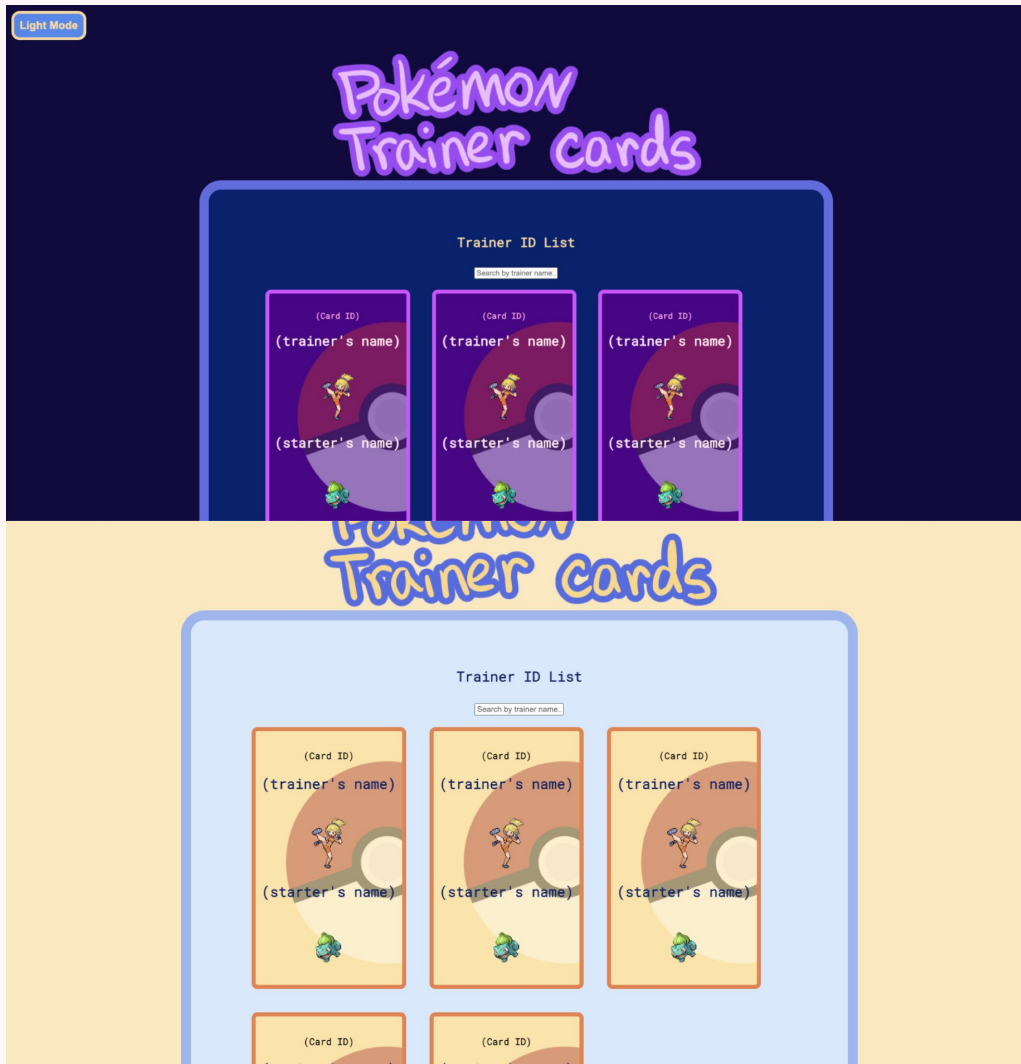

Pokemon Trainer maker

December 2021

02

Users could select their trainer's appearance, their choice of Pokemon, and save their cards on a page that shows all the previously made IDs.

03

A personal webpage I made to get more experience with UI design and showcase some of my merits. This was my first attempt at implementing a light/dark theme toggle.

Venus V. Li

- Web Designer/Computer Engineer -

About

I'm Venus Li! I'm a 21 year old college student majoring in Web Design and Engineering at Santa Clara University. This is a personal homepage I created to display my past coding projects and other information about myself. My first experience with CSS that kicked off my interest in coding occurred when I was 13. I was on an art site when I discovered a feature that allowed page customization using CSS, which I had no idea how to read or write at the time. Ever since then, the desire to learn how to use computer languages to design webpages never left my mind. It's very exciting for me to finally have the opportunity to apply my HTML and CSS skills to a greater cause!

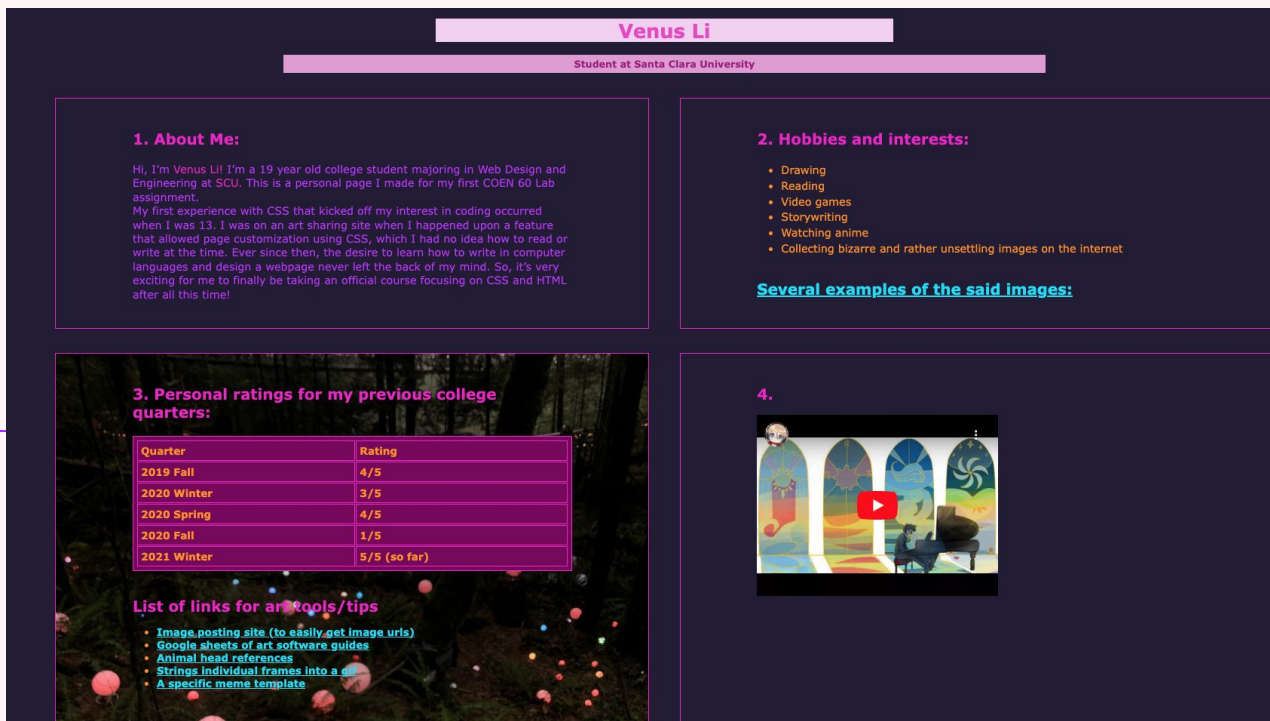

About Resume Projects Contacts

04

A more preliminary version of my website for a university assignment, which I later took creative liberties with and used to build my current website.
